

C. A e L a

1. The proposed rule requires that a State must have a minimum of 10% of its population in the State to be eligible for funding. This is a significant barrier to many States, particularly those with a large non-resident population. The proposed rule also requires that a State must have a minimum of 10% of its population in the State to be eligible for funding. This is a significant barrier to many States, particularly those with a large non-resident population. The proposed rule also requires that a State must have a minimum of 10% of its population in the State to be eligible for funding. This is a significant barrier to many States, particularly those with a large non-resident population.
